## **DETAILED ACTION**

### ***Drawings***

The drawing of Figure 1, as submitted on February 5, 2004, is objected to because currently the reference numerals (100), (110), (120), and (140) are not supported by the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3743

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller (U.S. Patent No. 4,899,762). Muller discloses in Figures 12 a surgical drape (10) comprising elements as recited in these claims including a dressing portion (14) and a drape portion (16), both the combination of which include a central flat body base (20) having a top cover (24) and a bottom cover (22). The bottom cover (22) is removed to expose adhesive backing (26). Figure 1 details the top cover (24) comprising incision guideline (50) that may also carry preprinted grid lines (53) wherein the grid lines (53) may be radio-opaque (i.e. of material opaque to x-rays). With regards to claim 6, Muller discloses the flat base (20) may be mutually compatible antiseptic material as layered in Figure 4.
